

PLANNED MAINTENANCE MANAGEMENT

In any environment periodic deep cleaning and general maintenance is as vital as the everyday operations.

We've used our extensive knowledge of all aspects of cleaning and maintenance to establish our own specialist division covering the wide range of disciplines this involves, including:

- Window/periodic cleaning (including specialist high level, canopies etc)
- Escalator cleaning (including risers)
- Specialist floor cleaning/maintenance (diamond polishing/vitrification)
- Entranceway deep cleaning
- Line marking
- Pigeon proofing
- Car park cleaning
- Scheduled maintenance
- Chewing gum removal
- Pressure washing/steam cleaning
- Gutter and roof cleaning

STRATEGIC WASTE MANAGEMENT

With ever more stringent regulations and increasing taxes, it's crucial to plan how waste is disposed of. Especially food waste from shopping centres, for example. That's where we can help, with a sustainable waste strategy for your business.

Our specialist knowledge makes sure you comply with the minefield of legislation – and anticipate any changes in good time. We'll show you where you can make savings, develop revenue streams from recycling and removal and lower management costs by diverting waste from landfill to recycling. And we can provide any equipment necessary to maximise efficiency, as well as managing the entire operation on your behalf.

Westgrove Environmental's over-riding aim is to send zero waste to landfill. We're also proud to be recommended by 'The Green Organisation', having 3-star status – the highest entry level possible. Furthermore, one of our high profile sites – Church Square Shopping Centre in St. Helens, Lancashire – recently gained a Green Apple award for environmental best practice.
