

BESPOKE SECURITY SOLUTIONS

In an ever-changing world, security has never presented a greater range of challenges. But the Westgrove Group has the experience, knowledge and specialist skills to meet them.

Our expertise extends across prestigious commercial premises, retail environments, distribution centres and leisure sites. And we provide manned guarding, concierge, 24 hour lock down and CCTV, vehicle monitoring, access control, mobile patrols, alarm response and key holding services.

We can also offer additional services. For example, we manage clients' car parks, including entry/exit, cash handling, data collection and analytical reports. For one-off events, we can provide additional security support. And our technology includes site attendance monitoring with the biometric Timegate system, hand-held PDAs giving real-time critical management information and a 24-hour communications centre at our Head Office in Warrington.

Specialist security training is carried out at our Academy, too. Courses include conflict management and resolution, counter-terrorism (including Projects Argus & Griffin and Operation Fairway), physical intervention training, first aid training and fire warden/fire risk assessment.

ADDING NEW DIMENSIONS TO SECURITY SERVICES

At the Westgrove Group, we're well aware that a modern security service is about more than just patrolling or guarding. So ours covers a much broader spectrum than you might expect.

Your welcome has a huge impact on first impressions. So it's vital to get your concierge services right – and we will. You can rely on our reception and security services – including main reception, VIP meet and greet, helpdesk and car park management – to be highly skilled, very professional and make customers and clients feel welcome, 24 hours a day.

Watch closely. One of the most effective security measures available, CCTV monitoring and Control Room Management is carried out by our fully PSS licensed officers. We can also provide remote CCTV monitoring via the internet, virtual concierge using Access Control via CCTV, Alarm Monitoring and video recording.

How secure are you? With a full security review from the Westgrove Group, you'll find out. Our experienced management teams will point out where there are any weaknesses in your security arrangements from full site appraisals and security strategies to legislative advice, training packages and risk assessments. And naturally, they can also put together a bespoke security service to address them.

If you're a multi-site portfolio client, many of these ancillary security services are provided free of charge.

“ I am hugely pleased with the service that Westgrove provide ”
