

Provision of Reactive Services

Breedon

Breedon is a leading construction materials group in Great Britain and Ireland. They produce cement, aggregates, asphalt, ready-mixed concrete, Welsh slate and specialist concrete and clay products and offer a range of contracting services.

The Westgrove Technical Services Team provide support services to Breedon Trading Ltd on many of their sites in the Northwest of England ensuring that the site plants are kept running and producing products which in turn helps Breedon to stay on schedule with their customers orders.

Our technical team are on call 24/7 to provide support to Breedon with all job tasks managed through our Job Logic CAFM system . Use of the system enables jobs to be prioritised and despatched to our technicians in real time with job and location information immediately available on their mobile devices.

Job completion data, including materials used and job specific RAMS, are captured whilst on site and sent to the back office system for processing through to invoice.

Typical works carried out for Breedon Trading Ltd include:

- **Electrical Installation & Repairs**
- **General Plant Repair**
- **CCTV Installation & Repair**
- **Portable Appliance Testing**
- **Pump Installation & Repair**
- **General and Emergency Lighting Installation**
- **EICR Support**
